- Knee Lift
- Includes wide table and other quilting accessories

Enjoy the highest standards of performance with the Innov-is 600

Be sure of the best stitch every time

With over 400 built-in stitch combinations, including a range of utility stitches from blind hems to advanced decorative patterns, the **Innov-is 600** will revolutionise the way you sew – powerful features include Brothers fully automatic thread tension system and sideway feeding.

Choose from 429 utility and decorative stitches including 10 automatic buttonholes and 3 font styles.

Easy to use functions

Just choose the function you want from the control panel, press the button and you're ready to sew.

Customised settings

Allows you to adjust the stitch width, length and thread tension to your personal preference. Customised settings can be saved to memory to use again in future.

Programmed thread trimming

The automatic thread trimming cuts both upper and lower threads at the end of each sewing task.

Error messages

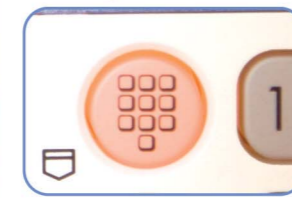

These alert the user to oversights. For example, if the buttonhole lever has not been lowered, a sound and display message will notify you.

Direct stitch selection

Simply key in the number of the pre-programmed stitch you would like to use.

My favourite stitch

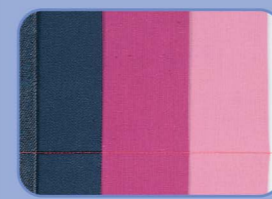

A handy function that allows you to store your favourite stitches, giving you one touch access to those most frequently used.

My Custom Stitch™

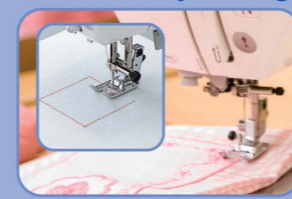

This unique feature allows you to design your own decorative stitches on the LCD display panel and save them to memory, to use whenever you wish. Extremely handy for quilting and similar design projects.

Automatic thread tension

Whatever fabric you use – light, heavy or stretchable the **Innov-is 600** automatically senses the thickness of your fabric and immediately adjusts to the most appropriate thread tension to suit your stitch.

Side way feeding

Ideal for attaching appliques to fabric that cannot be moved around, such as cylindrical pieces. Allows you to sew straight stitches and zigzag stitches to the left or the right.

Wide table

The extra width of the **Innov-is 600** helps make light work of large items and with the included wide table it's easier than ever to handle large projects such as quilts and bed linen.

Stitch reference Panel
The **Innov-is 600** is supplied with a detachable quick reference panel. So you can easily find the number of the stitch you want to use.

Presser-foot pressure adjustment

Helps you stitch pucker-free seams on even the stretchiest of knits. Simply adjust the pressure applied by the presser foot.

F.A.S.T. bobbin winding system

Just wind the thread four or five times round the bobbin, pass it through the guide slot and press start. It's bobbin winding made easy.

Quilting Extras

Sewing or quilting work is more versatile and neat with accessories that include a Quilting Foot, 1/4" Quilting Foot, Walking Foot, Quilting Guide and Side Cutter.

Speed control customised for zigzag width

The slide control can be set from slow to fast to ensure you always sew with safety and accuracy, particularly on intricate detail or curves. It can also be programmed to alter the stitch width.

Advanced needle threading system

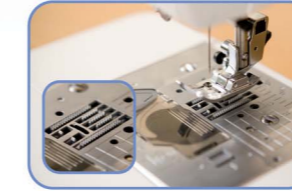

With the **Innov-is 600's** advanced in-built system, threading the needle is effortless.

Presser-foot levelling button

Keeps the presser foot level for smooth, consistent stitching over changing fabric thickness, such as the start of a seam or crossing seams.

Seven-point feed

With extra teeth for smoother feeding, it gives superior stitch quality, smooth, pinpoint seams on any weight of fabric, from sheer silk to corduroy and denim.

Knee lift

Free up your hands by using your knee to lift the presser foot. Ideal for working on large projects such as quilts.

429 stitches

The built-in stitch selection is perfect for enhancing the sewing of everything from clothing to home décor.
